Converts Word documents to JPEG, JPG, GIF, PNG and TIFF image formats. The conversion process is carried out using... Word to Image Converter 3000 Download With Full Crack is a straightforward application that allows you to convert DOC, DOCX and DOCM files to various image formats, provided Microsoft Word is installed on your system. It offers support for batch processing and can save data to a wide array of file types. Simple operating procedure If you need to add a lot of items at the same time, you can just drop their containing folder into the processing queue, to have the program automatically import the detected Word documents. You can change their order and select which of them need to be converted, as well as choose the desired output format. While more advanced settings are also available, novices should have no problem understanding these more basic functions. Customize output parameters Word to Image Converter 3000 Cracked Version allows you to define the size of the created image files, either by entering their width and height manually or by specifying a custom zoom value. You can also set the quality of output pictures, as well as insert watermarks. These can consist of text or images and can be made partially transparent. Unimpressive user interface The application's layout leaves a lot to be desired, as many unnecessary functions are displayed, but not available. These are not relevant to the program's intended purpose and have no reason to be included. Additionally, the interface appears to be rather outdated, although this by itself would probably not be a significant issue for most users. All in all, Word to Image Converter 3000 Free Download is an application that could prove to be useful, as
